

checklo

This template should help get you started developing with Vue 3 in Vite.

Recommended IDE Setup

VS Code + Vue (Official) (and disable Vetur).

Recommended Browser Setup

- Chromium-based browsers (Chrome, Edge, Brave, etc.):
 - Vue.js devtools
 - Turn on Custom Object Formatter in Chrome DevTools
- Firefox:
 - Vue.js devtools
 - Turn on Custom Object Formatter in Firefox DevTools

Type Support for `.vue` Imports in TS

TypeScript cannot handle type information for `.vue` imports by default, so we replace the `tsc` CLI with `vue-tsc` for type checking. In editors, we need Volar to make the TypeScript language service aware of `.vue` types.

Customize configuration

See Vite Configuration Reference.

Project Setup

```
pnpm install
```

Compile and Hot-Reload for Development

```
pnpm dev
```

Type-Check, Compile and Minify for Production

```
pnpm build
```

Lint with ESLint

```
pnpm lint
```
